Waukesha
Cherry-Burrell®

Pump:

Waukesha Cherry Burrell - [Model 130 Universal Twin Screw \(UTS\) Series](#)

Industry:

Dairy

Challenge:

Pump an elastic/stretchy type of processed mozzarella pizza cheese without breaking the elasticity before packing

Solution:

The customer partnered with SPX FLOW to install a Waukesha Universal Twin Screw (UTS) model UTS-130 pump.

The Twin Screw pump successfully pumped the cheese and did not break the elasticity of the product. The pump was intentionally over-sized to keep the processing speed low and avoid water separation (running at less than 400 RPM).
