INTRODUCING THE TRIPLEX HZ SWIVEL JOINT

End users of scrape surface heat exchangers have been using heated shafts for years to prevent product accumulation on the mutator shaft. They've also been battling leaky OEM swivel joints for years. That ends today. The new Triplex HZ Swivel Joint is aftermarket retrofittable on both Votator and Contherm mutator shafts to provide reliable, leak-free service.

Stocked & Shipped from Schaumburg, IL, the HZ Swivel Joint Features the following Standard:

- All steel construction (optional 316L stainless)
- Aftermarket Retrofittable to existing Votators & Contherms
- Maintainable Cartridge Design
- Universal use for heating & cooling
- 10x Performance vs. OEM joints
